

# Smart Kitchen

— an initiative by HGH India —

Addressing the demand for modular kitchens, kitchen appliances, cookware and kitchen tools which make cooking faster, healthier, environment friendly and more convenient...blending the conventional with modern technology.

Indian kitchens are adapting modern technology and convenience. Smart Kitchens are becoming a reality amongst Indian households. Cooking is simply becoming smarter!

HGH India 2022 will focus on the innovations in modular kitchens, kitchen appliances, cookware and kitchenware which make cooking faster, healthier, environment friendly and convenient. Blending the conventional with modern technology is essential. Objective is to reduce human intervention, provide convenience and up the hygiene quotient. Cooking is constantly undergoing transformation globally with the use of gadgetry and innovative appliances.

Smart Cooking is the way forward.

Focus of Smart Kitchen at HGH India 2022 would be to appraise the visitors on numerous innovations being introduced by manufacturers and brands from India and worldwide, to enable them understand the upcoming trends and products in these sectors.

From chopping to grating, cleaning to food preparation, blending to food processing, baking, steaming or sauteing, boiling to frying, toasting to roasting, icing to decorating...all kitchen activities are witnessing revolution in materials, processes, convenience and comfort. Automation, nutrition, hygiene, health and environment are the new key words in cooking.

Modular Kitchens are set to become more intelligent with smart appliances, gadgets and voice assistant. Hygiene and health safety from bacteria at all stages of food storage, preparation, processing and serving are new demands that will drive innovations.

At HGH India 2022 a special pavilion for Smart Kitchen in Hall 9 will showcase upcoming trends in modular kitchens, cooking, cookware, kitchen appliances and kitchen tools to update the retailers and trade visitors.

FOCUS **2022**
